

Part B — Hand-Drawn Sketch Guide

Important: The assignment specifically requires a hand-drawn sketch made by you using pen/pencil on paper. Do not submit AI-generated diagrams or printed graphics.

This guide tells you exactly what to draw and what to write in simple words.

Page Title

Write this at the top of the page:

"Trinethra Supervisor Feedback Analyzer — Thought Process & AI Guardrails"

Main Workflow Diagram

Draw boxes with arrows like this:

Supervisor Transcript
↓
Requirement Analysis
↓
Prompt Engineering
↓
Ollama AI Analysis
↓
JSON Validation
↓
Frontend Display
↓
Human Review

What To Write Beside Each Box

1. Supervisor Transcript

Write:

- Input transcript pasted by psychology intern
 - Transcript contains supervisor feedback about Fellow
-

2. Requirement Analysis

Write:

- Need structured analysis
 - Need score, evidence, KPI mapping
 - Need follow-up questions
-

3. Prompt Engineering

Write:

- Used strict prompts
- Used transcript-only rule
- Added hallucination prevention instructions

Also write these example prompt rules:

- "Use ONLY transcript evidence"
 - "Do NOT hallucinate"
 - "Return ONLY JSON"
 - "If information missing, say insufficient evidence"
-

4. Ollama AI Analysis

Write:

- Local LLM using Ollama
 - Used llama3.2 model
 - AI generates structured analysis draft
-

5. JSON Validation

Write:

Problems:

- AI sometimes returns broken JSON
- Sometimes adds extra explanation text

Solutions:

- JSON cleaning
 - Retry parsing
 - Regex fallback
-

6. Frontend Display

Write:

- Display score
 - Display extracted evidence
 - Display KPI mapping
 - Display gaps and follow-up questions
-

7. Human Review

Write:

- Human makes final decision
 - AI output treated as draft
 - Prevent automation bias
-

AI Guardrails Section

Draw a side box titled:

"AI Guardrails"

Inside write:

- ✓ Use transcript evidence only
- ✓ Strict JSON output
- ✓ Human review required
- ✓ Missing evidence detection

- ✓ Confidence level shown
 - ✓ Bias detection
-

Problems Faced Section

Draw another small box:

Problems Faced

Write:

- ✗ Broken JSON output
 - ✗ Inconsistent scoring
 - ✗ Extra AI explanations
 - ✗ Hallucinated assumptions
-

Solutions Section

Write:

- ✓ Better prompts
 - ✓ JSON sanitization
 - ✓ Low temperature (0.1)
 - ✓ Structured output format
 - ✓ Human verification
-

AI Disagreement Section

Very important.

Write:

"AI suggested high score but transcript lacked systems-building evidence. Final logic adjusted using rubric rules."

This shows critical thinking.

Small Architecture Diagram

Draw this:

Frontend

Express Backend

Ollama API

Structured JSON Response

Final Notes To Add At Bottom

Write:

- AI assists the psychology intern
- Human makes final decision
- Goal is faster analysis with reduced hallucination
- Structured output improves usability
